## ATHLETIC SKILLS

**Feet**

4 - Slightly Above Average

**Comments**

Reliable, consistent, no liability here for this player.

**Hands**

4 - Slightly Above Average

**Comments**

Reliable, consistent, no liability here for this player.

**Reactions**

5 - Above Average

**Comments**

Runs well. Showed alertness and aggressiveness on the bases and defensively. Looks like he should be able to defend the mound well based on the way he plays the game other places.

## Body Control

5 - Above Average

### Comments

Athletic player, does everything well, good fundamentals.

## Strength

4 - Slightly Above Average

### Comments

He has a nice frame but he is slender. His present strength is more towards the median than it is an asset for him at this time. This is an area that will enhance his development.

## Physical Development

4 - Slightly Above Average

### Comments

I wonder how big this player will get down the line. He is a medium size guy with medium size frame and build. It looks like he has a long way to go until his physical maturity.

# BASEBALL SKILLS

## Arm Action

5 - Above Average

### Comments

Quick stroke, high slot, bullet release, fair extension, loose wrist. For the effort of the arm it still works with consistent speed.

## Throwing Effort

4 - Slightly Above Average

### Comments

There is some effort to what he does on the mound which makes it difficult for him to repeat his release point. However, it is nothing so serious that won't be addressed as he gets experience on the mound. For a guy who has not pitched very much he sure shows a nice feel for an athletic delivery.

## Arm Strength

5 - Above Average

### Comments

Well above average for his age. Easy speed, high slot, gets leverage.

## Delivery

5 - Above Average

### Comments

Up tempo. He's a little bit herky jerky which makes it difficult for hitters to time him and to see the ball. Has deception.

### **Control**

4 - Slightly Above Average

### **Comments**

Sprays it around a little, effectively wild mostly due to inconsistency in the timing of his delivery. However, he is around the plate and athletic enough to improve his strike percentage in the zone.

### **Fastball**

4 - Slightly Above Average

### **Comments**

Works from a high slot and can angle the ball in on the RH hitter. Occasionally, he gets back door life on his fastball. More stuff than command oriented, but plays better than the radar gun readings.

### **Off Speed**

5 - Above Average

### **Comments**

It is not anything that he can repeat right now. But, at times, when he is on time, his breaking ball is pretty good. Shows tilt, angle, depth and spin. A true curveball, but not anything that should be his first pitch at this time. But, it should complement a fastball thrown for strikes very well.

## **PLAYER SUMMARY**

### **Summary/Action**

A good baseball player that pitches. This guy does it all pretty well. He can hit, he has speed and he is a solid defender. He is relatively new to the mound from what I understand and you can see the rawness in his inability to repeat his delivery with consistency. However, this is a very athletic player with good arm action and good baseball skills. 3 pitch mix, he showed a change up also that has promise.
