PLAYER SUMMARY

Summary/Action

Dynamic player with chance to play beyond college. Athletic and strong. Solid defender with some minor flaws at this time. Needs to trust self more and not rush through mechanics. Better ready position in field will allow him to better utilize tremendous defensive skill set. Has all the tools to stay in center field. Offensively he will be an impact power bat. Does need to learn how to use the field. He can have power to all fields and he needs to understand how that works. Needs to focus on line drive gap to gap stroke in order to maximize offensive skill set. Can become an impact player on bases as well and should continue to work on baserunning as well as stealing. Solid player with leadership ability. High ceiling here and just needs to be patient and let natural development happen.
