ATHLETIC SKILLS

Feet

3 - Average

Comments

Quiet feet, doesn't use them enough for the position.

Hands

5 - Above Average

Comments

Catches the ball with ease and keeps pitches in the strike zone.

Reactions

4 - Slightly Above Average

Comments

Heads up player on offense and defense.

Body Control

4 - Slightly Above Average

Comments

Balance with control of big frame.

Strength

5 - Above Average

Comments

Strong hands with frame to get much stronger.

Physical Development

5 - Above Average

Comments

Large lanky frame with room to get bigger.

BASEBALL SKILLS

Fielding

4 - Slightly Above Average

Comments

Hands are best tool. Other parts of catching are a little raw and need repetition and better use of feet. Flaws are correctable.

Range

4 - Slightly Above Average

Comments

Flexible behind the plate with tall frame.

Running

3 - Average

Comments

Big frame.

Arm Strength

4 - Slightly Above Average

Comments

Arm action and body make it easy to project more arm strength.

Arm Accuracy

4 - Slightly Above Average

Comments

Balance and body control.

Hitting Ability

4 - Slightly Above Average

Comments

Good setup at the plate. Uses hands to hit. Good knowledge of the strike zone. Needs to use the whole field better.

Power Potential

4 - Slightly Above Average

Comments

Big frame and strong. Power will come from making more consistent contact.

PLAYER SUMMARY

Summary/Action

In future will be catcher beyond high school with offensive and defensive skills. Best asset now is soft hands and bat that needs some minor adjustments. Defense needs better use of feet. Jumping rope will help along with agility drills with short quick starting, stopping and changing directions. When playing catch, try to get feet in throwing position when catching each throw. Between innings make the throw to 2B like it's in the game. Step toward 2B and work on being quick and getting the grip across the with seams. Suggest along toss to strengthen arm. Start out 30-60 feet and toss with around 3/4 effort (not as hard as you can at the start or the end). Grip the ball across the wide seams and throw overhand with the elbow as high as the shoulder. Make each throw a little longer. Throw as long as you can comfortably throw the ball in the air to your throwing partner. At that point make another 10-15 throws. Then move back in to the distance that you will be throwing in the game. About 130 feet for catchers throwing to 2B. When catching try to see the ball from the pitcher's hand all the way to your mitt. And do the same playing long toss or anytime that you are throwing. Also when throwing always have a target, your throwing partner's chest or cap will work. Very important to use the whole field when hitting. Two drills that help: Front toss from about 15 feet underhand with a firm toss (make sure the person tossing stays behind the screen) watch the ball from the hand to the bat a try to hit line drives up the middle and leftcenter. Also hit off a batting tee inside a batting cage. Put the ball on the the at the top of the strike zone and try to hit line drives to the back of the cage. During batting practice a strong suggestion is to take no more than 10-12 swings each round. Take as many rounds as you feel comfortable with. Batting practice or the game be sure to try to see the ball out of the hand until it hits the bat.
