Comments

* Curveball: 11-6 break; consistent break with average bite; has command and good rotation; is a now pitch that has further projection to get better; his out pitch

* Changeup: Turns over with action and feel, but below average command; down in dirt; has feel out of his hand with good arm action and deception; projectable pitch

PLAYER SUMMARY

Summary/Action

Compact body Right Handed Pitcher; aggressive with good base to his all stretch delivery; stays behind his front leg with lower half leverage; medium arc with full action and slightly above average arm speed; has consistent movement down in the zone to arm and glove side, making his fastball play above his present velocity; Out Pitch Curveball with command and show pitch Changeup in dirt that he mixes together with fastball very well; this kid is a real life pitcher in a world of carnival show throwers; I would pay to watch him anytime; needs to mature and get stronger over time; with continued work and development we see him as a Junior College/ Small College Starting Pitcher
