## ATHLETIC SKILLS

### Feet

5 - Above Average

### Comments

Agile with explosiveness and fluidity; always balanced; light

### Hands

5 - Above Average

### Comments

Easy, with room to be well above average in the future. Needs work on fundamentals: poor pre pitch set up, and catches ball off of right foot. All very correctable defects with work considering his above average athletic ability.

### Reactions

5 - Above Average

### Comments

Explosive and fluid with an above average first step.

## Body Control

5 - Above Average

### Comments

Above average. Above average athlete.

## Strength

3 - Average

### Comments

Lean body athlete with average strength for his age. Future chance for slightly above average strength.

## Physical Development

4 - Slightly Above Average

### Comments

Lean symmetrical body with room to develop and add strength. Do not feel that he will grow much in stature, but will mature and gain strength.

# BASEBALL SKILLS

## Fielding

4 - Slightly Above Average

### Comments

Athletic ability makes him slightly above average. Has defensive and throwing fundamental defects that must be addressed for him to progress.

## Range

5 - Above Average

### Comments

Explosive natural athlete. Fundamental issues hinder him slightly.

## Running

4 - Slightly Above Average

### Comments

Easy stride; 4.74 down the 1B line on a full swing; 3.68 on a Stolen Base/3.97 on a Stolen Base, standing up.

## Arm Strength

2 - Slightly Below Average

### Comments

I feel there is more natural strength than he shows. His feet and hands are out of sync, and separates too far away from his body. He also has a tendency to fly open with his front shoulder. All of these flaws are correctable.

## Arm Accuracy

4 - Slightly Above Average

### Comments

Slightly above average accuracy that is impressive considering fundamental drawbacks.

## Hitting Ability

5 - Above Average

### Comments

Short and quick stroke; average bat speed and above average bat head frequency; high hand set and an open stance; dives; uses whole field; good rhythm; mostly good bat plane, against lefthanded pitchers gets an uppercut and lunges.

## Power Potential

2 - Slightly Below Average

### Comments

Future potential for fringe to average power; too much concern with power will diminish his effectiveness as a hitter.

## PLAYER SUMMARY

Smart, aggressive and confident player; athletic with short quick swing that gets the bat head to the ball; talented with room to get better; has bat, speed, range, and is a weapon on the bases; must address fundamental issues on defense and throwing; power will not be a major factor in his game; plays with passion and enthusiasm.
