## Hitting Ability

3 - Average

Strength in swing. Barreled balls up in arc swing. Would benefit flattening out swing a bit to make hard contact on ground and line drives. Lowering hand set to start bat and relaxing arms, elbows down. Generate bat on more direct path to ball starting bat with hands. Take bottom hand to ball. Barrel will follow.

## Power Potential

4 - Slightly Above Average

## Comments

Size and leverage in swing with extension through ball generates good power on contact. Will drive balls in future with physical maturity. Presently loses power in core and lower 1/2 by rolling front foot on contact, turning ankle over. Must have solid base on both feet to hit and firm up stride foot on contact. Correctable mechanical hitting fault.

Makes strong accurate throws. Will most likely move to 3B as he matures. Will excel in high school and become a solid college player.
