# PLAYER SUMMARY

## Summary/Action

Catcher in the future with offensive and defensive skills in college. Aggressive competitor that has a lot of work to do to get better in all phases of the game and is up for the challenge. Basic catching instruction and more experience catching is going to help a lot. When throwing to 2B it is important to step directly toward 2B. A big part of catching is to CATCH THE BALL and try to keep it in the strike zone so your pitcher will get more strike calls. Not pulling pitches into the strike zone but catching the pitch and keeping it in the zone. Very important for a lot of reasons: SEE THE BALL OUT OF YOUR PITCHER'S HAND ALL THE WAY TO YOUR MITT, This should happen anytime you play catch or catch in the bull pen plus in the game. A drill to help hitting. Hit off a batting tee in the batting cage. Put the ball on the tee so it is at the top of the strike zone. Try to hit a line drive the full length into the back of the cage. Arm strength is very important. A good way to strength the arm is long TOSS. Play catch by throwing with about 3/4 effort. (Not as hard as you can). Throw overhand with the elbow as high as the shoulder. Make every throw a little longer as long as you can comfortably throw in the air to your throwing partner. When you reach that point make 10-15 more throws. Try to throw a little longer every day.
