ATHLETIC SKILLS

Feet

5 - Above Average

Comments

Feet work very well. Slightly better as CF'er vs 2Bman, but still light and agile in both positions.

Hands

5 - Above Average

Comments

Steady receiving ball. Quiet glove whether in OF or IF. Didn't see any excess or wasteful movements. Carried it quietly when ranging into gaps in CF.

Reactions

5 - Above Average

Comments

Read ball well overall, but better reads in CF. Showed excellent jumps when ranging to both gaps.

Body Control

5 - Above Average

Comments

Co-ordinated body movements and actions for age. Kept everything under control.

Strength

5 - Above Average

Comments

Player is strong for age and should continue to show lean athletic strength as he grows.

Physical Development

5 - Above Average

Comments

Has muscle development well suited for a baseball player. Longer, lean looking muscle development that shouldn't get too bulky as he matures. Good combination of looseness and strength.

BASEBALL SKILLS

Fielding

5 - Above Average

Comments

Really liked his defense in CF; looked natural and played position easy. Thought he was steady but less natural and easy at 2B. Handled position fine but will need more feel for it as he matures.

Range

5 - Above Average

Comments

Range in CF is solid 5 because of instincts/jumps more than raw speed. Range at 2B is steady, can make routine plays consistently but less likely to stretch out to make a play at 2B vs CF.

Running

4 - Slightly Above Average

Comments

Better runner under way than out of the box. Ran well when taking extra base or going from 1st-3rd base vs H-1B.

Arm Strength

3 - Average

Comments

Player needs to play long toss and stretch out throwing arm. Looks like he should have plenty more in there but needs arm speed to develop throws.

Arm Accuracy

4 - Slightly Above Average

Comments

Balls generally accurate. Needs feet planted firmly on ground for most accurate throws. Throwing while on the move less accurate, though not really a problem.

Hitting Ability

5 - Above Average

Comments

Player has fallen into excellent hitting approach. Strong enough to keep barrel inside ball and drive outside pitches very hard to the opposite gap. Took what I thought were some pro looking swings. Hit several balls very hard from gap to gap.

Power Potential

4 - Slightly Above Average

Comments

Player will have future strength for game power, but not the lift/loft type hit approach that will yield lots of HRs. Still, he will have a deep threat in his swing and will also be a gap/doubles threat and hit for a good average.

PLAYER SUMMARY

Exciting bat approach and potential; hope he doesn't change a thing. Should be able to hit to all fields with authority. Defensively looks versatile with infield and outfield skills/tools. May not have pure CF'er speed but shows signs of using instincts/jumps like former Angels' CF'er Jim Edmonds to make up the difference. Overall player has advanced baseball development for age.
