PLAYER SUMMARY

Landon Majerus is an XL framed kid with broad shoulders and a big arm. The velocity and size will make him a highly sought after Division-1 candidate. A RHS that featured a 2 pitch mix. FB was 79-84 and sat 80-81. Some late arm side run at times. He pitched with his FB at the top of the K-zone. His secondary was used very sparingly and ranged 74-75. It had 10/5 rotation with shape. The delivery was average with him showing some consistency of being on line and getting downhill. There was the occasional fall to glove side. Arm action was short, but with continued development, he will lengthen it out a bit. On this particular viewing, I saw an inconsistent release point which garnered control issues. As he matures, he will find his arm slot and release point and be more consistent.

Overall, this is a good looking RHS with size, arm strength, and a display of secondary with shape. I like what I see.
