ATHLETIC SKILLS

Feet

4 - Slightly Above Average

Comments

Displays gd ft coord/qckness/balance. Very light and agile on his feet.

Hands

4 - Slightly Above Average

Comments

Displays gd fielding hands/speed.

Reactions

5 - Above Average

Comments

Displays gd reflexes/reaction.

Body Control

5 - Above Average

Comments

Displays very gd bdy cntrl/athleticism on mound.

Strength

4 - Slightly Above Average

Comments

Very lean athletic grey hound type bdy frame. Gd natural strength throughout.

Physical Development

3 - Average

Comments

Bdy currently up/dwn. Lacks lots of physical muscular development. Lean bdy has lots of life/bounce. Rm to fill frame add weight.

BASEBALL SKILLS

Arm Action

5 - Above Average

Comments

Long, loose, and whippy. Arm wrks very ez out frnt at release. Effortless mechanics.

Throwing Effort

5 - Above Average

Comments

None whatsoever.

Arm Strength

4 - Slightly Above Average

Comments

Arm wrks clean and EZ. Player has unlimited potential on mound. Lacks proper mechanics which is limiting player pitching velocity output.

Delivery

3 - Average

Comments

Tall full windup delivery w/big knee stroke.

Control

3 - Average

Comments

Lacks pitch consistency but thrws strikes all over strike zone. Did not see him hit the same spot with FB twice in a row or zone consistency.

Fastball

4 - Slightly Above Average

Comments

FB 76-78MPH. Fastball has good rotation and occasional riding life.

Off Speed

2 - Slightly Below Average

Comments

CH 64MPH. CB loose and lacks command. Lacks ability to get on top of pitch. Pitch gets away from in RHH box.

PLAYER SUMMARY

Summary/Action

Player possesses untapped velocity output. Player has a number of pitching corrections to adjust to maximize player potential. Most glaring correction is with landing feet. Player lacks front-side stability. Currently lands slightly closed and spins off on front-side. Lacks follow through and finish. Bad habit of watching pitches. Not following through bending at waist leaves player standing straight up. Needs to improve pitching downhill with legs/delivery. Correct these mechanics and FB velocity will see 3-4mph bump and increased command.
