**PLAYER EVALUATION AND SCOUTING REPORT**

The Scouting Report developed by Don Reynolds Professional Baseball Group aims at providing athletes a snapshot of where their skills are currently and where their skills can take them in the future. The goal is to give athletes the grounds to improve their game with specific instruction from some of the best scouting talent in the nation.

TC Top Prospects works with Don Reynolds Professional Baseball Group who provide a collaborative effort on every Scouting Report they produce. With over 200 years of scouting experience from a group of 10+ scouts, they can create a unique scouting report for every athlete. Each report provides a projection of talent, specific instruction for improvement, and baseline rankings for each subcategory of scouting. These rankings are on a 1 to 5 scale, with 3 being average.

College Sports Evaluation produces objective data to give athletes insight into where their skills are currently. In addition, the data in the report can provide hard metrics on hitting and overall athleticism. Combining the objective and subjective data allows athletes to see where their strengths and weaknesses are and improve their overall game. You will find a glossary of all of the Blast Motion terms on the last page.

The results from this report are based solely on how the athlete performed in one day. Other factors play into skill level, and the report does not reflect the ability to improve or regress.

**PLAYER BIO**

**TC NATIONAL TEAM BATES**

**PLAYER NAME:**  
Westin Thompson

**POSITION:**  
Outfield

**PLAYER NUMBER:**  
10

**GRAD YEAR:**  
2025

**WEIGHT:**  
165lbs

**HEIGHT:**  
6'1"

**THROWS:**  
Right

**BATS:**  
Right

**EVALUATION DATE: SEPTEMBER 16, 2021**

## Don Reynolds Professional Baseball Group

### TC Top Prospects

#### ATHLETIC SKILLS

Feet	Hands	Reactions
5 - Above Average	5 - Above Average	5 - Above Average
Displays gd OF ftwrk and ability to break on balls deep in gaps.	Displays excellent hand/eye. Very soft fielding hands.	Displayed excellent OF reflexes and jumps on the ball.

Body Control	Strength	Physical Development
5 - Above Average	5 - Above Average	5 - Above Average
Excellent bdy cntrl and ability to make adjustments in full stride.	Current physical ability ahead of class. Contd strength gains w/maturity.	Excellent physical development and strength for current age. Gd natural bdy strength. More w/maturity.

#### BASEBALL SKILLS

Range	Running	Arm Strength	Fielding
5 - Above Average	4 - Slightly Above Average	5 - Above Average	5 - Above Average
Displays excellent OF range and ability to make the long running catch.	Long strider, underway speed. Need to improve first step to be a base stealer in future.	Displays plus arm strength from OF. Enough arm strength for all 3 outfield positions. Arm strength still developing.	Displays excellent OF routes and ability to make in stride adjustments. Displays ability to open hips and track balls in gaps.

Arm Accuracy	Hitting Ability	Power Potential
5 - Above Average	3 - Average	3 - Average
Thrws to bases well and keeps ball down.	Very gd setup at plate and separation to launch position. Swing lacks fluidness, somewhat long w/tend to lock out lwr half. Needs to imprv looseness to swing/bdy and soften lwr half.	Strng kid no doubt.... Power potential has yet to translate when you see other physical talents on the field. Lack of looseness/fluidness to swing is blocking power potential.

#### SUMMARY/NOTES

Excellent ballplayer with outstanding developing physical attributes for the game. Very pleasant to work with and coach. Has very good competitive spirit which shows on field and amongst his teammates. A lot of upside with continued grwth/maturity and development. Will have to decide where future position/concentration will be.

Please note, the Scouting Report and Summary portions of the Player Evaluation are meant to be a projection of where you could play. The Objective Data portion of the Player Evaluation is meant to show you where you are at currently with your skill set. The goal is to use both objective and subjective data to build your current skill set into what you potentially could be.

## College Sports Evaluation

#### Blast Motion PCR Scores

Plane	Connection	Rotation
52	58	48

#### Blast Motion Power Metrics

Bat Speed (mph)	Rot. Accel (g)	Peak Hand Speed (mph)	Power (kW)
66.9	9.2	20.1	3.34

#### Blast Motion Contact Metrics

Early Connection (deg)	Conn. at Impact (deg)	Vert. Bat Angle (deg)	Time to Contact (sec)	On Plane Eff. (%)	Attack Angle (deg)
95	78	-28	0.17	67	3

#### Exit Velocities

Exit Velo 1	Exit Velo 2	Exit Velo 3	Average
81	75	81	79.0

#### Foot Speed

30-1	30-2	Average
3.83	3.83	3.83

Please note, the Scouting Report and Summary portions of the Player Evaluation are meant to be a projection of where you could play. The Objective Data portion of the Player Evaluation is meant to show you where you are at currently with your skill set. The goal is to use both objective and subjective data to build your current skill set into what you potentially could be.

# BLAST<sup>®</sup> TERMINOLOGY

**Plane:** Scores the path of the swing as it moves towards the ball. Measured on a 20-80 scale.

**Connection:** Scores the early connection of your body from the early connection before the swing through the connection at impact. Measured on a 20-80 scale.

**Rotation:** Scored by combining rotational acceleration, bat speed, and power to determine the speed of the overall rotation of the swing. Measured on a 20-80 scale.

**Bat Speed:** Scores the total speed of the barrel of the bat at the time of impact. Ideal range: 53-67mph.

**Rotational Acceleration:** Scores how quickly your bat accelerates into the swing plane. Ideal acceleration is above 9.9g.

**Attack Angle:** The angle of the bat's path, at impact, relative to horizontal. A positive value indicates swinging up, and a negative value indicates swinging down, where zero is perfectly level. A positive attack angle will likely result in balls hit in the air (line drives, pop flies, and home runs). A negative attack angle will often result in grounders. Ideal range: 0-15 degrees.

**Early Connection:** The relationship between your body tilt and vertical bat angle at the start of the downswing. Establishing good connection (90 degrees) early in the swing helps you get on plane and increases your ability to adjust to all pitch locations. Ideal range: 80-105 degrees. 90 degrees is optimal for early connection.

**On Plane Efficiency:** Scores the plane of a swing based on the percentage matched from an optimal bat plane. Ideal range: 65%-85%.

**Connection At Impact:** Measures the relationship between your body tilt and vertical bat angle at impact. Maintaining good connection (90 degrees) for all pitch locations is an indicator of dynamic adjustability. Ideal range: 80-95 degrees. 90 degrees is optimal for connection at impact.

**Vertical Bat Angle:** The angle of the bat with respect to horizontal at the moment of impact. Vertical Bat Angle is measured in degrees and provides the location of the barrel of the bat relative to the knob of the bat at impact. Vertical Bat Angle will be zero when the barrel of the bat and the knob are parallel to the ground. Vertical Bat Angle will be negative when the barrel of the bat is below the knob of the bat at impact. Bat angle is dependent on pitch location, typically a negative number.

**Power:** The average Power generated during the swing is found from the effective mass of the bat, the Bat Speed at impact, and the average acceleration during the downswing. Power is measured in Watts. Higher Power is achieved when a hitter is able to swing a heavier bat and accelerate it to higher speeds. Ideal range: 1.75-3.75kW.

**Time To Contact:** Measures the time from the start of the downswing to impact. Ideal range: 0.15-0.20sec.

**Peak Hand Speed:** The fastest hand speed reached throughout the swing. Ideal range: 19-25mph.
